BIOMBOS

by Carlos Torre Hütt

The S and 30° screens are light and flexible structures whose most outstanding attribute is the handmade wicker weave. Their utilitarian vocation, which refers to that of a curtain, is to serve as screens or space dividers; the curves and angles resulting from the designed structure generate changes of layouts and shadow games across the entire surface.

CARLOS TORRE HÜTT

About

Architect, designer, museographer and curator. Far from being limited to a single dimension of the discipline, his professional work spans a broad design spectrum and responds to the concern of finding a language, by means of buildings, objects, spaces and exhibitions, that describes the habitat of the contemporary society to which he belongs.

His projects, always guided by a business vision, gravitate around the exploration and pursuit, through aspects such as materiality and craft, of an identity that represents the place and time in which he lives and develops.
